EDIBLE LANDSCAPING AND GREEN ROOFS AT THE ELC

WABASSO ISLAND, Fla. Edible Landscaping and Green Roofs are upcoming programs being held at the Environmental Learning Center (ELC).

The co-author of “Florida’s Incredible Wild Edibles,” Peggy Lantz, will be presenting a workshop entitled “Edible Landscaping” on Nov. 1 from 10am to 12pm. Ms. Lantz will describe the best food producing plants for your yard while still providing attractive landscaping. The end result is fresh food for your table in return for your investment of gardening time, water and fertilizer. The cost for the 2 hour workshop is \$15.

On Nov. 5 Dr. Jay Garland is coming to the ELC for the kick-off event to this season’s Noted Environmentalist Lecture Series co-sponsored by the Indian River Land Trust. Dr. Garland is the Chief Scientist/Biological Programs Manager for Dynamac Corporation at the Kennedy Space Center. He will describe the new green roof technology that is being promoted around the country because it can lower energy costs and increase the life of a roof. This informative lecture is from 6:30pm – 8pm and costs \$30.

To make reservations, call the ELC at 772-589-5050. Additional programs may be found at www.DiscoverELC.org. The ELC is a non-profit nature center on Wabasso Island between US#1 and A-1-A at the western end of the Wabasso bridge.
